

Re: "02-278"

I don't want the FCC to implement any proposal that would lessen Indiana's Telephone Privacy law protections.

Indiana's Telephone Privacy law has improved my Families time at home.

Indiana's law has been very effective. I used to receive one or two calls per day, now I only receive one in a week.

I appreciate the fact that you are trying to make a nationwide regulation, but I would hate to have it diminish the Indiana one in effect.
